Question: Swap Text

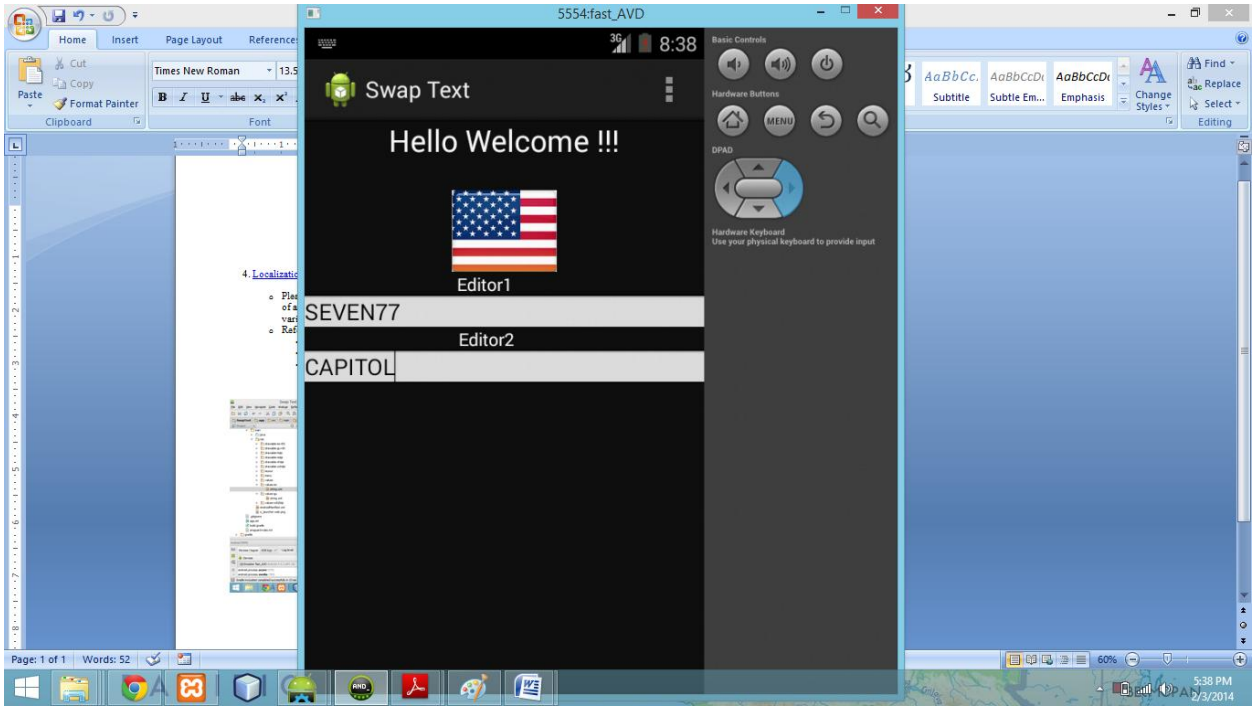
Android Project to Swap Text in two text boxes on D-pad Center click.

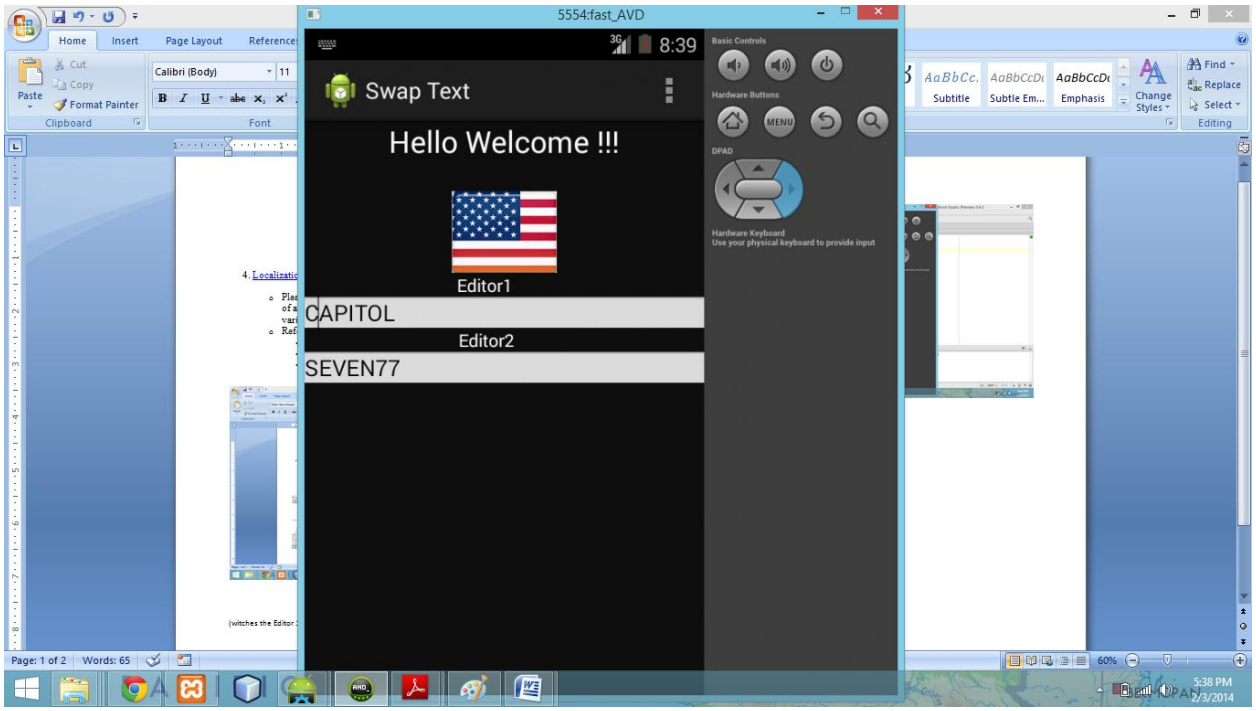
Question: Localization

- Please enhance the Swap Text project to add a "Hello" title and an image of a national flag at the top of the GUI. The title and the image can be varied depending on Locale configuration.

I have Configured for Español Language ::

(witches the Editor 1 and Editor 2 test when we press right Dpad)





using

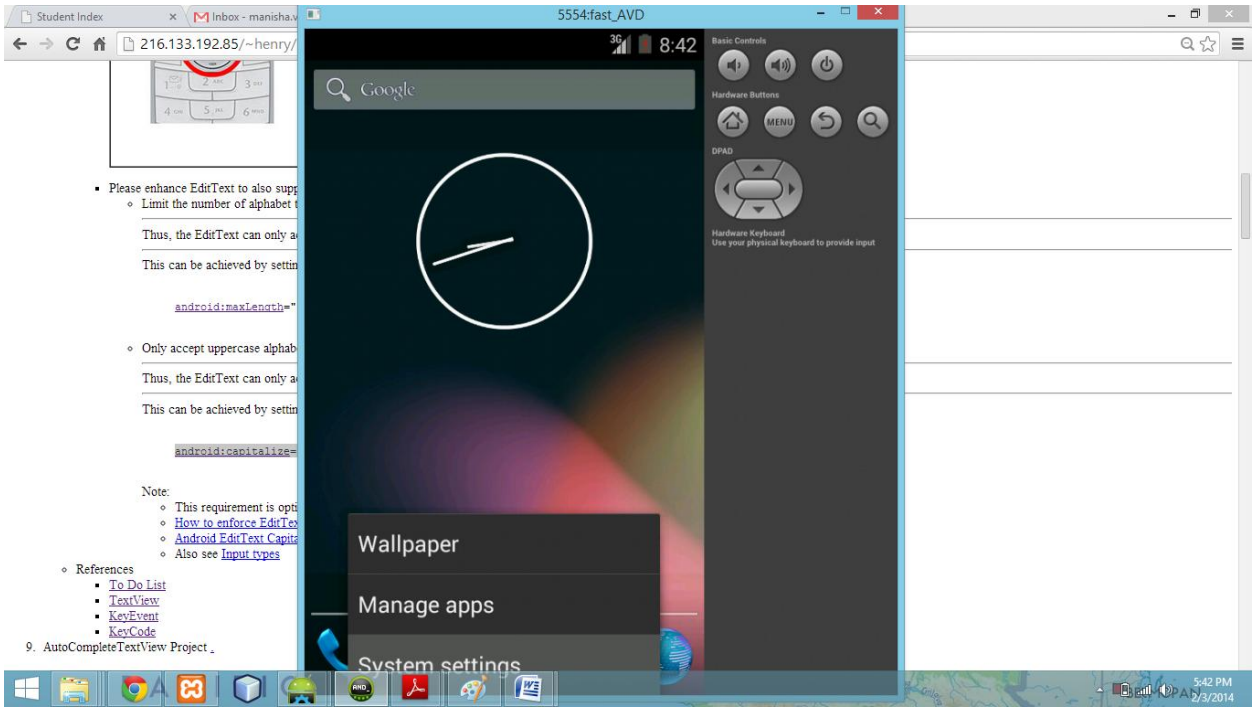
`android:maxLength="7"`

`android:capitalize="characters"`

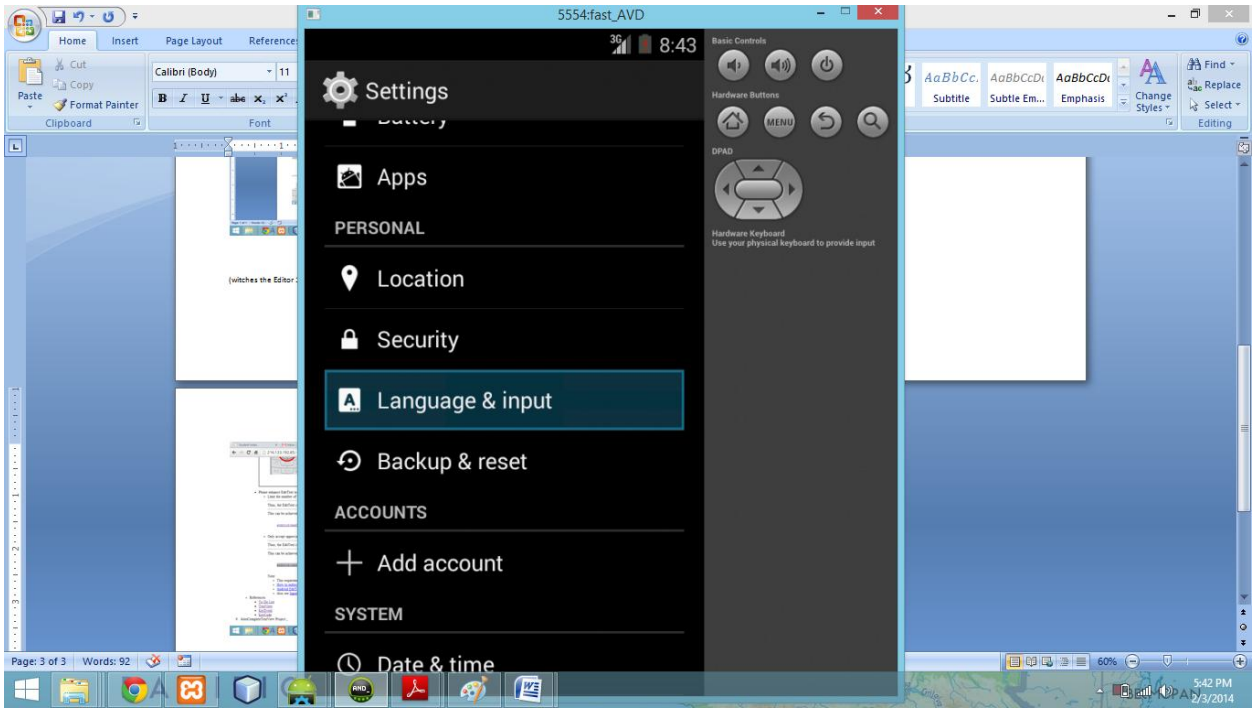
I am able to restrict the input for only 7 and all the capitals.

To Change the Local to the Espanol

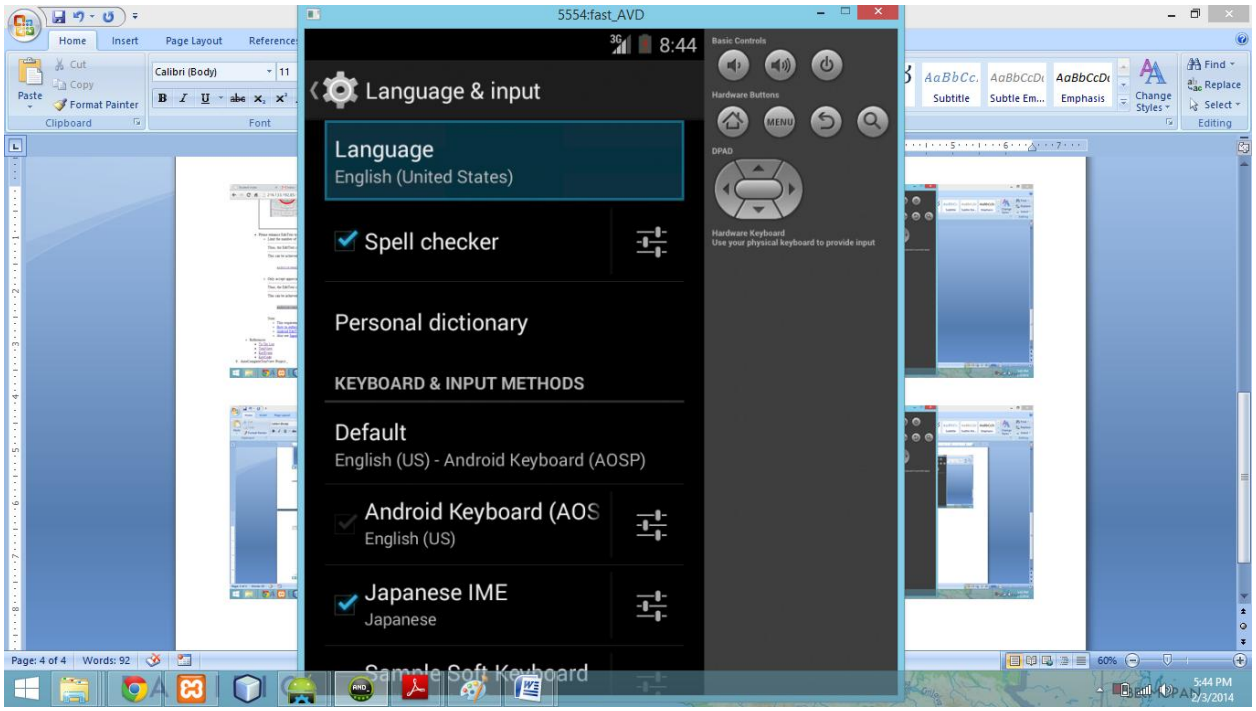
go to Home >

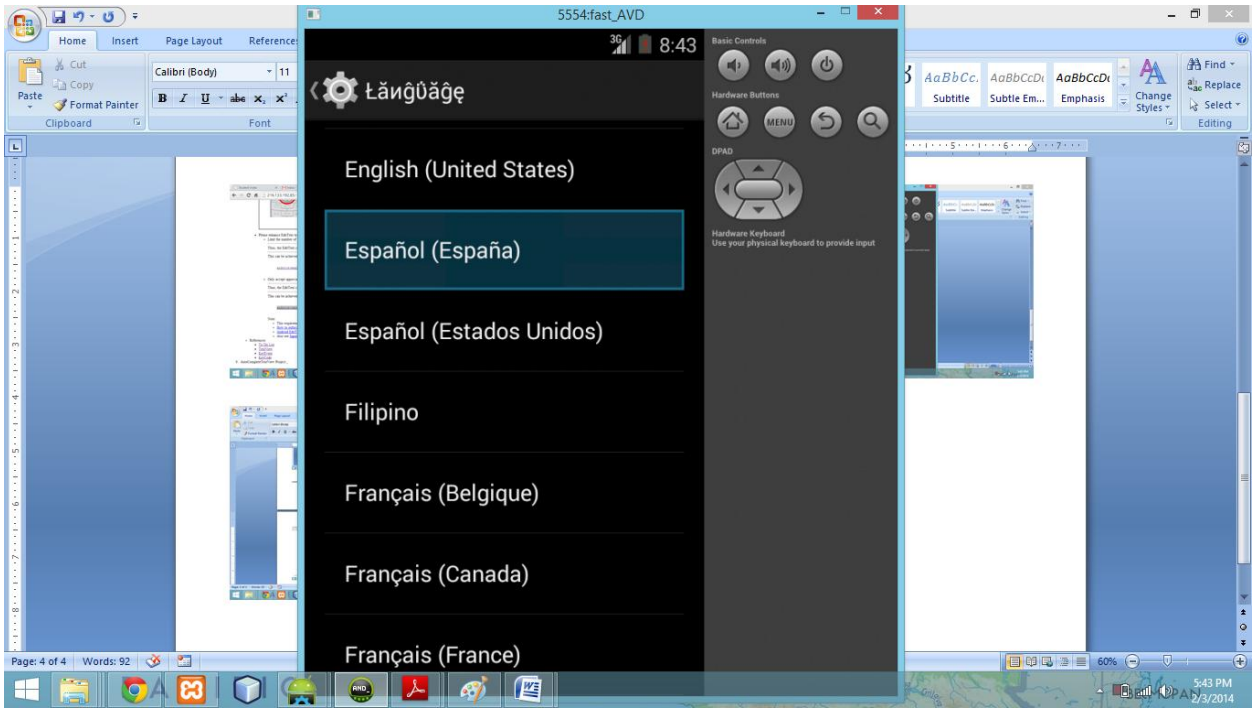


5554:fast_AVD
8:42
Google
Wallpaper
Manage apps
System settings

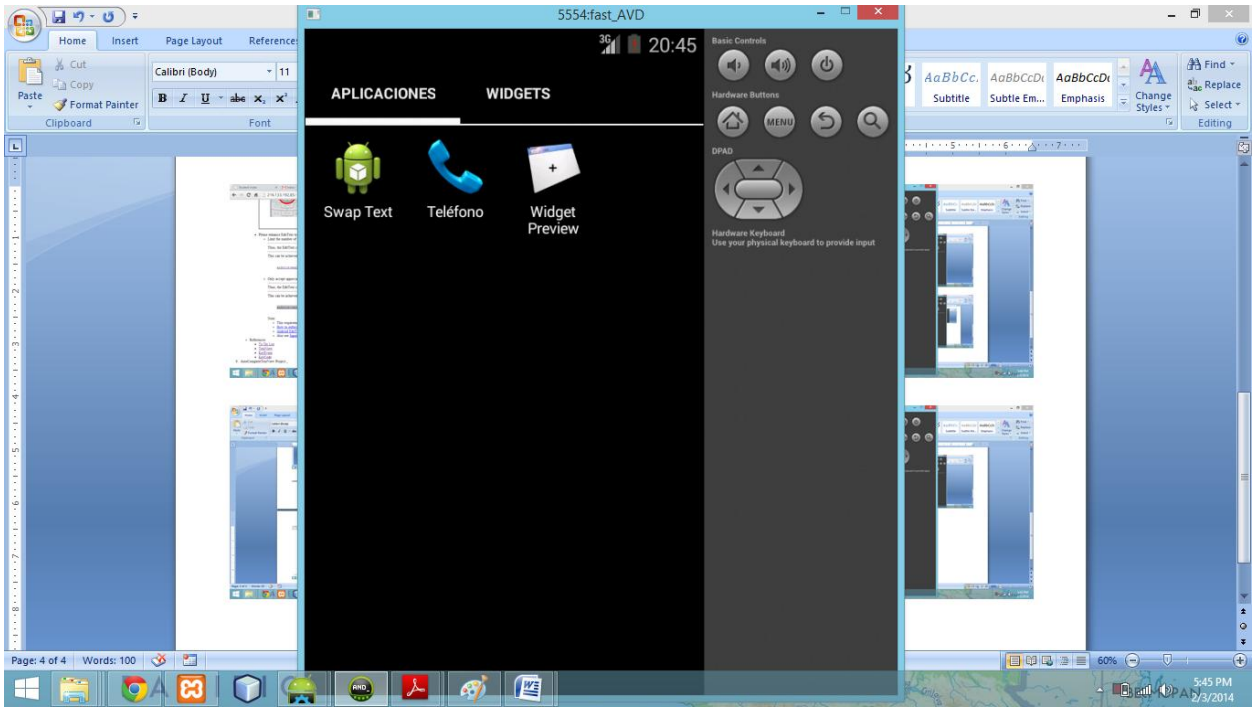


5554:fast_AVD
8:43
Settings
Apps
PERSONAL
Location
Security
Language & input
Backup & reset
ACCOUNTS
Add account
SYSTEM
Date & time

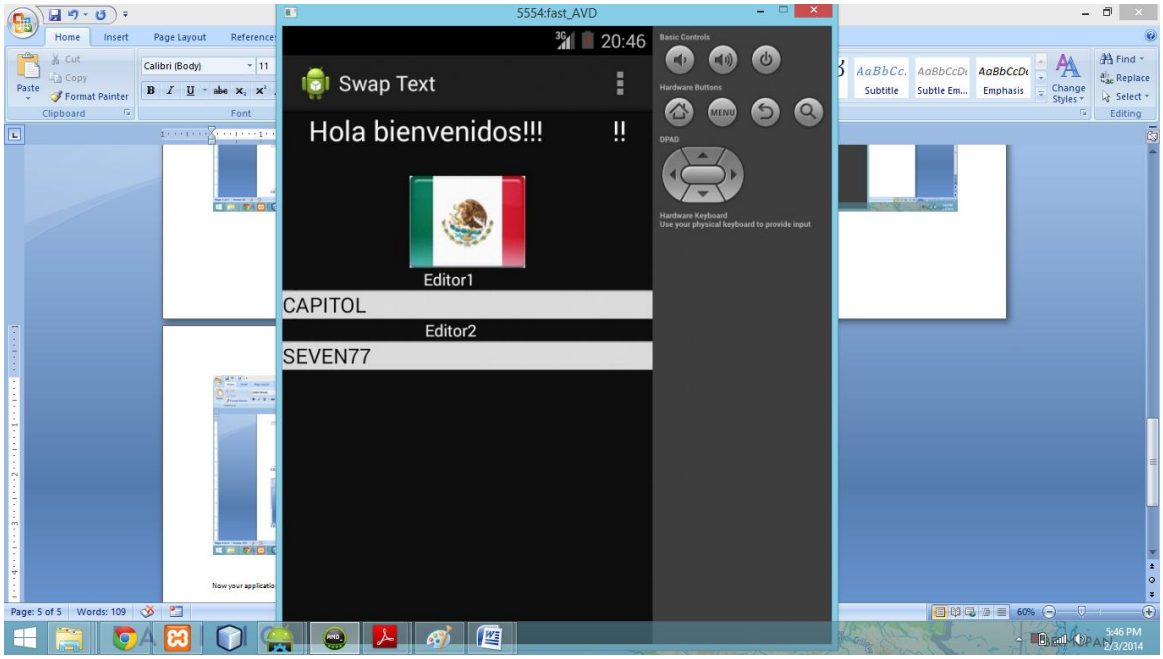




Press the home again and go to application

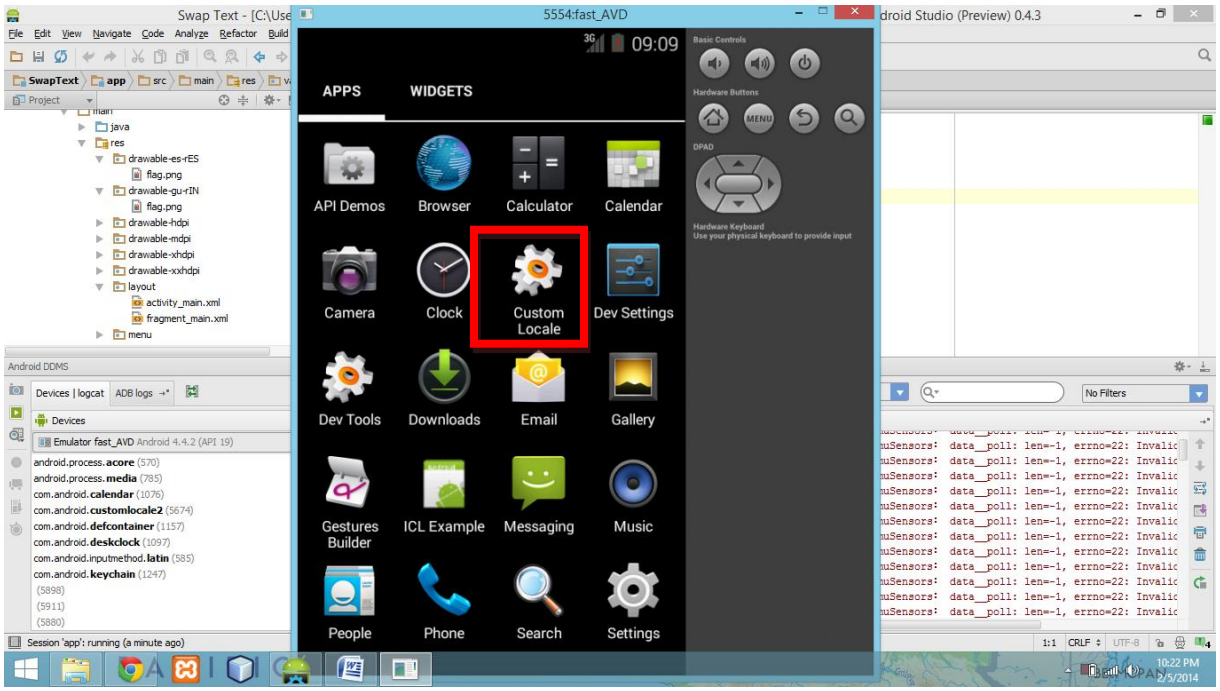


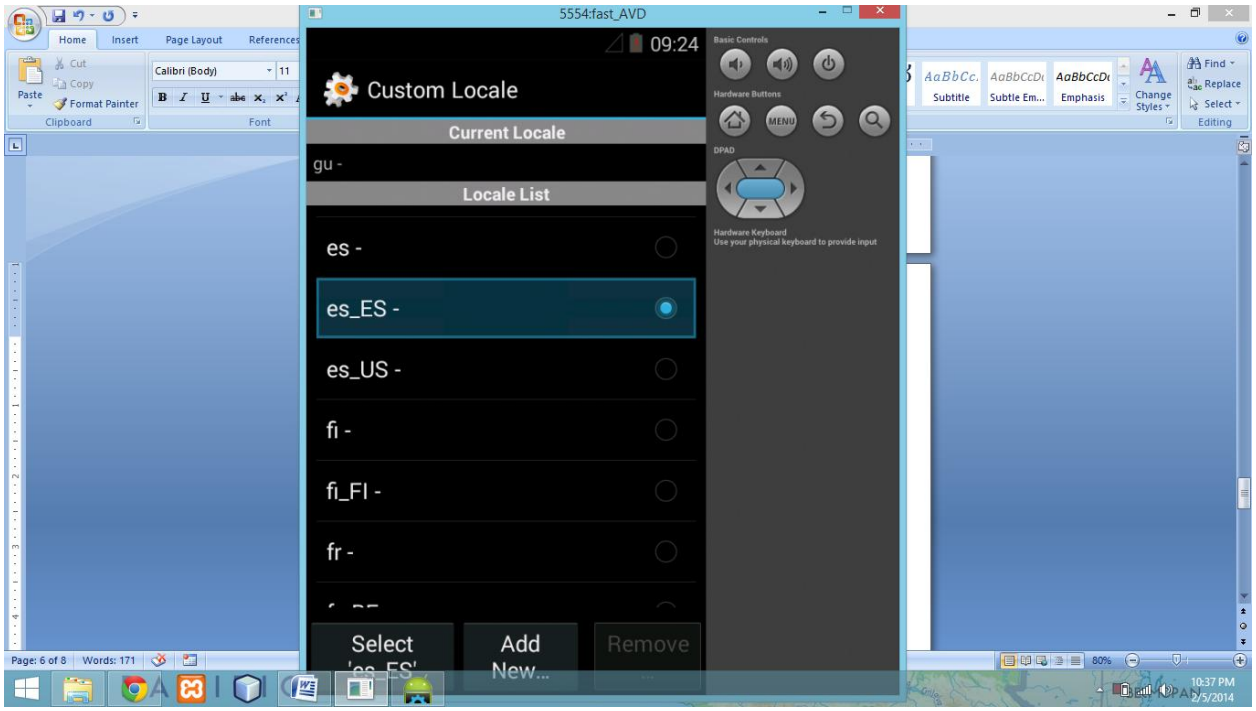
Now your application will open Local page for Espana(Espanol)

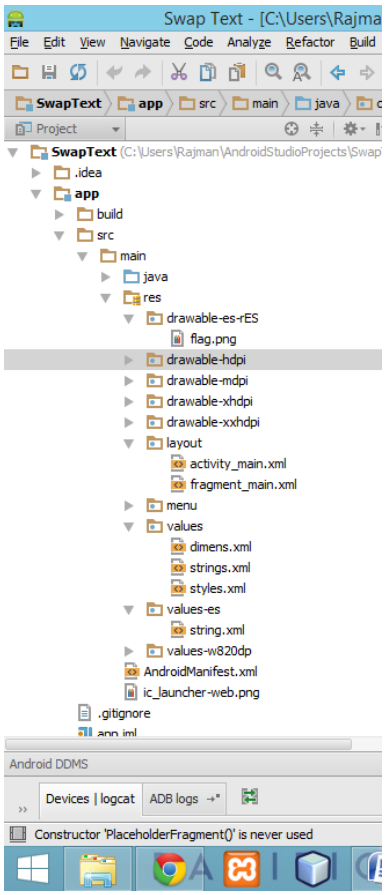


Same way i have also made page for gu-rIn (Language : Gujarati Country : India)

We can also change local from Custom Local from menu >>







Here is screen shot for hierarchy required to create above app :
